Riverside Yoga · Booking and payments website

Quote brief

7 September 2026 · Example Studio · for the sales team

Everything needed to write the offer to Riverside Yoga: what we build, in which order, how much work each item takes, recurring costs, timeline, team and support terms. Items follow the order of the client's request, so the offer can be compared line by line with the others.

Technical estimate, not an offer. Amounts are computed at a rate of **€400** per day, net of VAT, for the team described in § 9. Discounts and risk margin are decided by sales.

1. In short
2. What the client asks
3. How we build it
4. What goes into each release
5. The estimate item by item
6. Later development
7. Recurring costs
8. Timeline
9. The team
10. Support after launch
11. Ownership
12. Assumptions, exclusions, open points
13. Notes for the offer

1 · In short

Riverside Yoga wants to stop running bookings on WhatsApp and class packs on a spreadsheet. Members will see the weekly schedule, book and cancel from their phone, and pay online for drop-ins and class packs; instructors tick attendance; the front desk manages timetable, members, credits and refunds. The **late-cancellation rule** (free up to 12 hours before, then the credit is lost) is what stops the money lost on no-shows.

We propose **two releases**. **Launch**, in about six weeks, puts schedule, bookings and class packs online before the January rush, and fits the client's budget on its own. **Memberships**, three weeks later, adds monthly subscriptions, the automatic waiting list and the reports.

A · Launch	B · Memberships	A + B · Total
€27,200	**€12,400**	**€39,600**
68 days · about 6 weeks	31 days · 3 more weeks	99 days · about 9 weeks of work

Net of VAT, at €400 per day. Recurring costs at launch: **about €50–100 per month** of third-party services, plus Stripe fees on what is sold and the support package chosen (§ 7 and § 10).

2 · What the client asks

The original request is in `client-sources/`. In short:

Section	What it contains
1 · Schedule	Weekly timetable with class type, level, instructor, room and **spots left**.
2 · Booking	Account, book and cancel; **free cancellation up to 12 hours before**, later the credit is lost.
3 · Payments	Drop-ins and packs of 5 or 10 by card; **later, a monthly unlimited membership**.
4 · Waiting list	Join a full class and **get the spot automatically** when someone cancels.
5 · Instructors	Their classes and attendance check-in from the phone.
6 · Front desk	Timetable (mostly weekly repeats), instructors, members, credits, refunds; attendance and revenue per month.
7 · Emails	Confirmation and a reminder the day before.
Mobile	Must work well on phones; **a native app could come later**.
Timing and budget	Booking and payments live **before the January rush**; about €20,000–30,000 for the first version.

3 · How we build it

One mobile-first web application, one managed database in Europe, and Stripe for every payment. No app store, no server to run: members book from the phone's browser, and the studio pays a few tens of euros a month to keep it online. The booking rules — capacity, the 12-hour window, credits — are enforced in the database, so two people can never take the last spot.

Component	Technology	Why
Website, member area, instructor view, admin	Next.js on Vercel, EU functions	One codebase for every role. Public pages are indexable: «yoga classes near me» is how new members arrive.
Database, sign-in, files	Supabase: PostgreSQL, auth, storage, EU region	Bookings and credits change in one transaction; row-level rules let members see only their own data.
Payments	Stripe Checkout and Billing	Cards, Apple Pay and Google Pay, receipts, refunds and, in the second release, subscriptions with a customer portal.
Emails	Transactional email service	Confirmations and reminders that actually arrive, from the studio's own domain.

Component	Technology	Why
Scheduled jobs	Database cron and functions	Reminders the day before, credit expiry, waiting-list promotion.

Details in Infrastructure, `technical/architecture.md` and `technical/bookings-and-credits.md`.

4 · What goes into each release

Launch must already **earn money and stop the no-shows**: schedule, booking with the cancellation rule and class packs are all in it. Memberships and the automatic waiting list come second: they matter, but the studio can run January without them, and they are the most delicate parts to get right.

Area	A · Launch	B · Memberships
1 · Schedule	Weekly timetable, class and instructor pages, spots left	—
2 · Booking	Accounts, book, cancel, 12-hour rule, no-shows	Booking for a friend with one's own credits
3 · Payments	Drop-ins, packs of 5 and 10, expiry, refunds	Monthly unlimited membership, pause, cancellation
4 · Waiting list	not in the first release	Join, automatic promotion, email to the promoted member
5 · Instructors	Their classes, attendees, check-in	Substitutions between instructors
6 · Front desk	Timetable, rooms, members, manual credits, refunds	Attendance and revenue reports, CSV export
7 · Emails	Confirmation, reminder, cancellation, receipt	Membership renewal and failed-payment emails

5 · The estimate item by item

Working days per item and amount at €400 per day, net of VAT. Items follow the client's list.

Item	Launch days	A · Launch	Memb. days	B · Memberships	A + B
DESIGN					
Analysis and design Kick-off workshop, booking and cancellation rules, credits model, architecture, release plan	5	€2,000	1	€400	€2,400

Item	Launch days	A · Launch	Memb. days	B · Memberships	A + B
UX/UI Mobile-first flows for members, instructors and front desk, design system, clickable prototype	8	€3,200	2	€800	€4,000
1 · SCHEDULE					
Website and weekly schedule Next.js pages for classes, instructors and prices, indexable by search engines; live spots left	6	€2,400	—	—	€2,400
2 · BOOKING					
Accounts and member area Sign-in by email link, profile, bookings and credits history, consents	3	€1,200	1	€400	€1,600
Booking and cancellation rules Book, cancel free up to 12 hours before, late cancellations and no-shows consume the credit	6	€2,400	1	€400	€2,800
3 · PAYMENTS					
Drop-ins and class packs Stripe Checkout for 1, 5 and 10 classes, credits ledger with expiry, receipts, refunds	7	€2,800	—	—	€2,800
Monthly memberships Stripe subscriptions for unlimited classes, renewals, pause, cancellation, customer portal	—	—	6	€2,400	€2,400
4 · WAITING LIST					
Waiting list with automatic promotion Join a full class, first in line gets the freed spot and an email, rules near the start time	—	—	3	€1,200	€1,200
5 · INSTRUCTORS					
Instructor view Their classes on the phone, attendee list, attendance check-in	3	€1,200	1	€400	€1,600
6 · FRONT DESK					
Admin panel Recurring timetable, rooms, instructors, members, manual credits, refunds, cancellations	7	€2,800	3	€1,200	€4,000
Attendance and revenue reports Monthly attendance per class and instructor, revenue by product, CSV export	—	—	3	€1,200	€1,200
7 · EMAILS					

Item	Launch days	A · Launch	Memb. days	B · Memberships	A + B
Confirmations and reminders Booking confirmation, reminder the day before, cancellation and payment emails	3	€1,200	1	€400	€1,600
PLATFORM					
Database and access rules PostgreSQL schema, row-level rules per role, migrations, capacity checks in the database	4	€1,600	1	€400	€2,000
Backend functions and webhooks Booking transactions, Stripe webhooks, scheduled reminders and expiry jobs	4	€1,600	2	€800	€2,400
QUALITY AND RELEASE					
Security Authentication, roles, rate limits, OWASP review, tested backup and restore	2	€800	1	€400	€1,200
GDPR Consents, privacy notice in the flows, data export and deletion, retention	2	€800	—	—	€800
Testing Automated tests on booking rules and payments, acceptance testing with the front desk	3	€1,200	2	€800	€2,000
Technical documentation Architecture, deployment, backup and restore, front-desk manual	1	€400	1	€400	€800
Training Sessions for front desk and instructors	1	€400	1	€400	€800
Project management Weekly check-in, demos every Friday, releases	3	€1,200	1	€400	€1,600
Warranty Three months after each release, included; then monthly support packages		included		included	—
Total	**68**	**€27,200**	**31**	**€12,400**	**€39,600**

6 · Later development

Not in the estimate. We list them because the client mentioned them (the app) or because they are the natural next step for a studio.

Later development	Days	Indicative amount
Native app for iOS and Android Same booking and payments in an app, push reminders, store publication	25–35	€10,000 – €14,000
Gift cards and promo codes Gift vouchers bought online, discount codes for campaigns	3–5	€1,200 – €2,000
Workshops and retreats Special events with their own price, deposit and capacity	4–6	€1,600 – €2,400
Instructor payroll report Classes taught and attendance per instructor, ready for monthly pay	2–3	€800 – €1,200
Second studio A second location with its own rooms, timetable and reports	4–7	€1,600 – €2,800

7 · Recurring costs

Third-party services, in the studio's name and paid by the studio. They depend mostly on the number of members.

Service	Launch ~350 members	Growth ~1,000	Scale 3 studios, ~3,000
Supabase: database, sign-in, storage	€25	€25–110	€110–200
Hosting (Vercel)	€20	€20–40	€40–80
Transactional email	€0–20	€20–35	€35–90
Error monitoring	€0–26	€26	€26–80
Off-provider backup copy	€5–10	€10–20	€20–50
Total per month	**€50–100**	**€100–230**	**€230–500**

Other costs	Amount
Domain	€15–30 per year, if the studio does not have one
Stripe, on what is sold	about 1.5% + €0.25 per European card payment; about 0.7% more on memberships
Support and maintenance	monthly packages from €480 (§ 10)

Indicative, on price lists of September 2026, net of VAT, dollar at par. On €6,000 of monthly sales Stripe costs about €120: less than two no-shows a week.

8 · Timeline

Phase	Weeks from kick-off	Duration
A · LAUNCH		
Kick-off workshop, rules, prototype	1–2	2 weeks
Development, demo every Friday	2–6	5 weeks, overlapping
Acceptance testing with the front desk, go-live	6–7	2 weeks
Launch live	**week 7**	**about 6 weeks of work**
B · MEMBERSHIPS		
Development	8–10	3 weeks
Testing and release	10–11	1 week
Memberships live	**week 11**	**before the January rush with a September kick-off**

Dates start from signature and delivery of the client's materials (photos, class descriptions, prices, Stripe account). The contract states a maximum response time (five working days), beyond which dates move.

9 · The team

Role	What they do	Commitment
Senior full-stack developer · project lead	Analysis, database and booking rules, Stripe, security; the studio's single contact	whole project
Senior full-stack developer	Website, member area, instructor view, admin panel, emails	whole project
UX/UI designer	Mobile-first flows, prototype, design system	first two weeks, then on call
Tester	Acceptance testing with the front desk before each release	before releases

A small senior team using AI-assisted development tools: that is what keeps the days low compared with a traditional agency.

10 · Support after launch

- **Warranty: three months after each release**, included. It covers defects in what was delivered against what was agreed; not new requests.

- **Routine maintenance**: library and system updates, Stripe and email changes, backup checks, monitoring.
- **Evolutionary maintenance**: new features and changes, from the package hours or by the day.

Package	Hours per month	Fee	What is included
Essential	8	€480	Routine maintenance, bug fixing, monitoring, email support
Standard	20	€1,100	As above, plus small improvements and a phone contact
Evolution	40	€2,000	As above, plus continuous development and a monthly planning meeting
Out of package	—	€60 per hour €400 per day	Hours beyond the package; +30% out of hours or on public holidays

Severity	Example	Taken in	Solved or worked around
Blocking	Nobody can book or pay	4 working hours	1 working day
Severe	Reminders not sent	1 working day	3 working days
Normal	A defect with a workaround	2 working days	next release

Service hours: Monday–Friday, 9–18. Unused hours roll over to the next month, not beyond.
For a studio of this size the **Essential** package is enough after launch.

11 · Ownership

- **To the client, on payment of each phase**: source code, repository, database and schema, configuration, documentation, design assets.
- **Accounts in the studio's name from day one**: domain, Supabase, Vercel, Stripe, email, monitoring. The studio opens them — with our guidance — and invites us as administrators, and can remove us at any time without losing anything.
- **Third-party libraries and services** stay under their own licences: we list them in an annex, with licence and cost.
- **Free exit**: at the end we hand over access, deployment and restore documentation, and one day of handover to whoever takes over.

12 · Assumptions, exclusions, open points

To clarify at the meeting

Point	Why it matters
Do class packs expire?	We assume packs of 5 expire after 2 months and packs of 10 after 4. No expiry is simpler; expiry with extensions by the front desk is included.
Existing credits on the spreadsheet	We include a one-off import of members and remaining credits from a clean spreadsheet. Cleaning it is the studio's job.
Refunds	We assume refunds go back to the card through Stripe. Store credit instead of refunds is a setting, not extra work.
Memberships and waiting list fairness	Does a member with an unlimited membership take a waiting-list spot before a pack holder? We assume first come, first served.
VAT and invoices	Stripe receipts are included. If the studio needs tax invoices from its accounting software, that integration is not.

Not included

- Third-party service costs (§ 7), accounts and licences: in the studio's name and paid by the studio.
- Content: photos, class descriptions, instructor bios, translations.
- Legal advice: privacy notice, terms and the cancellation policy text are written by the studio's lawyer; we provide the technical information.
- Marketing, campaigns, user acquisition.
- Native mobile app (§ 6).

13 · Notes for the offer

- **Rate**: €400 per day. To change it, change it in `estimate/estimate.py` and regenerate this document.
- **Budget**: the client mentioned €20,000–30,000 for the first version. Launch alone is **€27,200** and does everything that stops the no-shows; say it clearly in the offer.
- **Range**: **€39,600 – €45,500** for both releases, with up to 15% risk margin.
- **One contract with two phases**: Launch is signed now, Memberships is confirmed after the first weeks of use, at the same rates.
- **Payment milestones**: 50% at kick-off and 50% at go-live of each phase.

Example Studio · internal estimate for Riverside Yoga, 7 September 2026. Amounts are generated by `docs/estimate/estimate.py`: do not edit them by hand here.
